DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING (CYBERSECURITY)

B.E. – Computer Science and Engineering (Cybersecurity)
(REGULATIONS 2024)

Vision of the Institution

IV	To become a globally renowned institution in Engineering and Management, committed to providing holistic education that fosters innovation and sustainable development
-----------	--

Mission of the Institution

IM 1	Accomplish value-based quality education through innovative teaching-learning process.
IM 2	Enrich Engineering and Managerial Skills through cutting-edge laboratories to meet the demands of global integration.
IM 3	Enhance innovation and research to meet the evolving needs of industry, society, and sustainable development.

Vision of the Department / Programme: (Computer Science and Engineering (Cybersecurity))

DV	To produce ethical cybersecurity technocrat for supporting digital ecosystems and sustainable global development.
-----------	---

Mission of the Department / Programme: (Computer Science and Engineering (Cybersecurity))

DM 1	Deliver quality education in cybersecurity through Immersive learning.
DM 2	Impart interdisciplinary skills to meet global cybersecurity challenges through State of art Laboratory.
DM 3	Foster research, innovation, and ethical practices to promote sustainable digital security.

Programme Educational Objectives (PEOs): (Computer Science and Engineering (Cybersecurity))

The graduates of the programme will be able to	
PEO 1	Core Competency: Analyze and manage security incidents through effective threat detection and response strategies.
PEO 2	Professionalism: Exhibit interdisciplinary skills to address cybersecurity challenges with ethical integrity that contribute to global cyber resilience.
PEO 3	Career Development: Engage in lifelong learning, research and entrepreneurship to foster innovation and lead advancements in cyber security

Program Outcomes (POs)

PO1	Engineering Knowledge: Apply knowledge of mathematics, natural science, computing, engineering fundamentals and an engineering specialization as specified in WK1 to WK4 respectively to develop to the solution of complex engineering problems.
PO2	Problem Analysis: Identify, formulate, review research literature and analyze complex engineering problems reaching substantiated conclusions with consideration for sustainable development. (WK1 to WK4)
PO3	Design/Development of Solutions: Design creative solutions for complex engineering problems and design/develop systems/components/processes to meet identified needs with consideration for the public health and safety, whole-life cost, net zero carbon, culture, society and environment as required. (WK5)
PO4	Conduct Investigations of Complex Problems: Conduct investigations of complex engineering problems using research-based knowledge including design of experiments, modelling, analysis & interpretation of data to provide valid conclusions. (WK8).
PO5	Engineering Tool Usage: Create, select and apply appropriate techniques, resources and modern engineering & IT tools, including prediction and modelling recognizing their limitations to solve complex engineering problems. (WK2 and WK6)
PO6	The Engineer and The World: Analyze and evaluate societal and environmental aspects while solving complex engineering problems for its impact on sustainability with reference to economy, health, safety, legal framework, culture and environment. (WK1, WK5, and WK7).
PO7	Ethics: Apply ethical principles and commit to professional ethics, human values, diversity and inclusion; adhere to national & international laws. (WK9)
PO8	Individual and Collaborative Team work: Function effectively as an individual, and as a member or leader in diverse/multi-disciplinary teams.
PO9	Communication: Communicate effectively and inclusively within the engineering community and society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations considering cultural, language, and learning differences
PO10	Project Management and Finance: Apply knowledge and understanding of engineering management principles and economic decision-making and apply these to one's own work, as a member and leader in a team, and to manage projects and in multidisciplinary environments.
PO11	Life-Long Learning: Recognize the need for, and have the preparation and ability for i) independent and life-long learning ii) adaptability to new and emerging technologies and iii) critical thinking in the broadest context of technological change. (WK8)

PROGRAMME SPECIFIC OUTCOMES (PSO's)

PSO1	Secure System Design: Design and implement secure systems to protect data and infrastructure from cyber threats.
PSO2	Threat Detection and Response: Detect and respond to cyber threats using modern tools and ensure compliance with relevant standards.
