### Vision

To become a globally renowned institution in Engineering and Management, committed to providing holistic education that fosters research, innovation and sustainable development.

### Mission

Deliver Value-Based quality education through modern pedagogy and experiential learning.

Enrich Engineering and Managerial Skills through cutting-edge laboratories to meet evolving global demands.

Empower research and innovation by integrating collaboration, social responsibility, and commitment to sustainable development.

### DIRECTOR MESSAGE

The Industry Institute Interaction Cell (IIIC) at K.S.R. College of Engineering plays a pivotal role in bridging academia and industry. Through MoUs, skill-based courses, internships, workshops, and faculty training programs, we ensure our students gain real-world exposure and industry-ready skills. Our collaborations with leading organizations enhance employability, foster innovation, and promote research. We encourage students and faculty to actively engage in IIIC initiatives, shaping future leaders in engineering and technology. Together, let's build a stronger industry-academia partnership for excellence. Together, let us shape a generation of professionals who will lead with knowledge, innovation, and integrity.

Dr. P. Murugesan  
Director CR & SD

# INDUSTRY CORNER

## Design and Make leaders embrace digital transformation in the face of uncertainty

Autodesk's 2025 State of Design and Make report examines trends affecting the more than 300 million professionals employed in Design and Make industries and provides insights to help those professionals address current challenges. Industry leaders indicate they face challenges from economic pressure, skills gap and emerging technology, but they also report positive outcomes and ROI from digital transformation initiatives and investments in sustainability. Autodesk is working with customers on education, skills training and digital transformation to foster innovation, promote sustainability and advance technology to ensure a positive impact on the world.

Today's leaders in Design and Make industries face ongoing challenges as they try to make the most of emerging technologies in the face of economic pressures, skills gap and talent shortages. However, according to Autodesk's 2025 State of Design and Make report, many of them have seen positive benefits from digital transformation and sustainability efforts within their organizations

## Empowering Engineering Students with Real-World Skills using Autodesk

Using Autodesk software as a student can significantly enhance your career prospects and employability. Many employers in industries such as architecture and engineering actively seek candidates with experience using Autodesk tools. Having proficiency in Autodesk software demonstrates to potential employers that you have practical knowledge and skills necessary for the job. It sets you apart from other candidates and gives you a competitive edge in the job market. Additionally, with Autodesk software being widely used across industries, learning how to use these tools can open up a wide range of career opportunities. Whether you aspire to be an architect, engineer, or designer, having Autodesk skills on your resume will undoubtedly make you more attractive to employers.

In conclusion, every student should consider using Autodesk software due to its numerous benefits. From gaining real-world experience with industry-standard tools to accessing enhanced learning opportunities and enjoying cost-effective solutions, using Autodesk as a student is a smart choice. Moreover, it can significantly boost your career advancement prospects by making you more employable in industries that rely heavily on these tools. So why wait? Start exploring the world of Autodesk today.
